Profile

A software generalist with extensive experience on small teams and remote work. Interested in clean solutions which mix tried-and-true tech with the cutting edge.

Experience

SENIOR SOFTWARE ENGINEER, THE GROUNDWORK; REMOTE – 2014-2017

Designed and built several core services of The Groundwork platform which was used extensively by the Hillary For America campaign. Primarily focused on the donation processing service.

SENIOR SOFTWARE ENGINEER, ARC90/READABILITY; NEW YORK, NY/REMOTE – 2011-2014

Worked on a small team who designed and built a next generation publishing platform for an international news agency. Implemented several features of the Readability service and its associated products Readlists and Mustread.

SOFTWARE ENGINEER, LOFTY; NEW YORK, NY – 2010-2011

Helped build and maintain an online marketplace for vacation rentals. Focused on ingesting thousands of properties and associated booking and availability information from several real estate companies.

DEVELOPER, CHARITY: WATER; NEW YORK, NY – 2009-2010

Built a social fundraising platform which algorithmically assigned funds to individual water projects across the globe and reported back to donors and fundraisers.
